

## **Exercise 6.4**

(Objectives 6.6)

1) Given the following function

```
def nPrint(message, n):  
    while n > 0:  
        print(message)  
        n -= 1
```

What will be displayed by the call `nPrint(n=4, message='a')`?

- A. aaaaaa
- B. aaaa
- C. aaa
- D. invalid call
- E. infinite loop

2) Assume function **f** is defined below. Check if a) and b) are correct function calls.

```
def f(p1, p2, p3):  
    return p1=p2+p3
```

a) `f(30, p2 = 4, 10)`

b) `f(30, p2 = 4, p3 = 10)`
