

Exercise 3.1

(Objective 3.1)

Take two numbers and check whether the sum is greater than 5, less than 5, equal to 5; and whether sum is odd. Complete the program below by filling in blanks.

```
print("Enter first number")
first = int( input())
print("Enter second number")
second = int( input())
#Blank 1
print("Sum is greater than 5:",sum>5)
print("Sum is equal to 5:",#Blank 2)
print("Sum is less than 5:",#Blank 3)
print("Sum is odd:",#Blank 4)
```
