

## **Exercise 1.3**

**1. Let us try following examples. Are you given an error, warning or output?**

1) In a print statement, what happens if you leave out one of the parentheses, or both?

```
print("hello"  
print"hello")  
print"hello"
```

2) If you are trying to print a string, what happens if you leave out one of the quotation marks, or both?

```
print("hello)  
print(hello")  
print(hello)
```

**2. Start the Python interpreter and use it as a calculator.**

1) How many seconds are there in 42 minutes 42 seconds?

2) How many miles are there in 10 kilometers? Hint: there are 1.61 kilometers in a mile.

3) If you run a 10 kilometer race in 42 minutes 42 seconds, what is your average pace (time per mile in minutes)? What is your average speed in miles per hour?
